► Roller Blinds

Our Roller blinds offer a choice of classic or contemporary designs, made in a wide range of fabrics from our leading fabric houses. They are a perfect solution for any room in your home and can be fitted inside or outside of the window recess. Also available in voile, blackout, and moisture resistant for bathrooms and kitchens.

Our blinds conform to current Child Safety legislation and are offered as manually operated, cordless, battery, operated with remote control for that modern solution. Finishing touches include coloured headrail cassettes, metal chains, bottom bars, shaped bottoms with decorative braiding to personalise your choice.

▶ Vertical Blinds

Practical and stylish vertical blinds are ideal especially for patio doors, bi-fold doors, bathrooms, kitchens, and office windows. The louvres can be rotated to allow light into the room, as well as maintaining a choice of privacy. They can be stacked back neatly to either side or one side left or right and can be operated with chains or wands for child safety.

▶ Roman Blinds

Our superb choice of Roman blinds is available in an endless range of fabrics and are designed to complement any room in your house adding a luxurious and timeless sense of style. Our blinds are made to fit your windows perfectly and can be supplied with a blackout finish and will fit inside or outside the window recess.

▶ Vision Blinds

Vision blinds are a modern solution and a contemporary design where two layers of translucent and opaque horizontal striped fabrics are adjusted to allow different light settings. Each stripe will pass one another to allow for perfect light control and can be left fully down or raised to the height needed.

Chosen as a modern alternative blind style to add practicality and style to any window in your home where you want to control the light to the room as well as your privacy levels.

▶ Visage Blinds

Visage blinds offer a sense of warmth and security to your home by virtue of their unique design and actions. Two layers of fabric are connected by horizontal sheer vanes thus allowing you to filter light and offer different levels of privacy as the blind is raised or lowered.

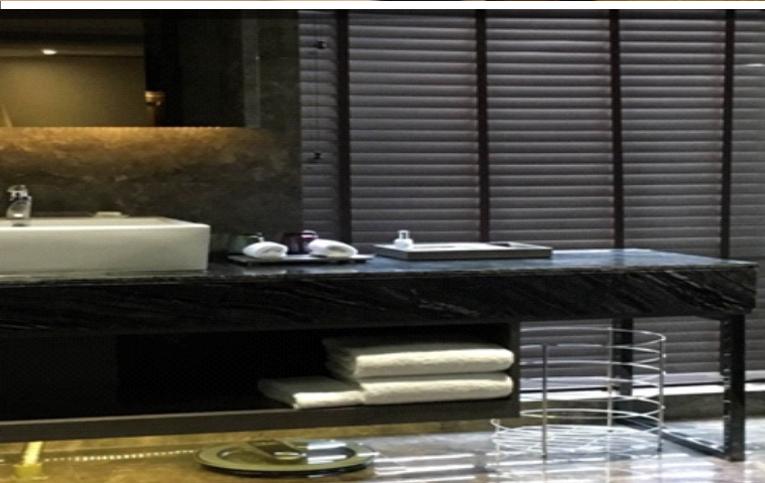

Also offered with the addition of a battery powered or mains powered control mechanism and remote control for added luxury.

► Basswood Blinds

Using natural grain woods and smooth grained timber these blind really do provide a warm and elegant window solution for any room in the house. Supplied in natural wood finishes or smooth painted slats we offer you a wide choice of product to choose from.

A very functional window solution these venetian style blinds give you complete control as well as style and practicality. A choice of 18 available colours, 21 tape options and slat widths, 25mm, 35mm, 50mm and 63mm complete this offer.

► Fauxwood Blinds

The Fauxwood blinds offer a versatile and uncomplicated design and are one of the most popular choice in window solutions. They simulate real wooden blinds but are made of a different material. Ideal and practical for bathrooms and kitchens they are an excellent choice for areas of increased moisture and offer heat resistance and are low risk of fading and warping due to excessive heat from sunlight.

A choice of 7 colours with corresponding tapes. Easily maintained just needing a wipe over with a damp cloth they have excellent wear qualities and are very durable.

► Perfect Fit Blinds

Perfect fit blinds are a great solution for double glazed windows and doors fitting directly on to most UPVC frame without the need to drill or for holes to be made thus retaining the integrity of your UPVC windows and doors. They fit perfectly, as the name implies, on to your windows and glazed doors without showing gaps to the sides.

Thermally efficient they are an excellent choice for style and safety and will look great anywhere in your home especially as the easily operated blind sits within its frame and comes in a choice of colour to match the existing window and glazed door.

► Design Ideas

Roman Blind and Wooden Blind combination:

Using a wooden blind inside the window recess and a Roman blind with cassette outside the window recess allows for a design led use of materials, colours, and fabrics. You can choose to pull the Roman blind to different heights depending on the time of day, the amount of light you would like or to soften the look of the window dressing.

Roman Blind and Curtain combination:

Often our customers choose a combination of Roman blinds and Curtains especially at large windows where the blind can be drawn or partly drawn and the curtains can either be full curtains or dress curtains, which frame the window and allow for further choice in the use of fabrics and design.

This combination is especially suited to all styles of bay windows which can also be framed by a dummy dress curtain.

Roman Blind and Visage Blind combination:

Using a Visage blind inside the recess to allow for variable light and privacy as well as a Roman blind outside the recess to allow for a great choice of fabrics and design. The Roman blind with a cassette can be either a dress item or fully functional Roman blind whichever you wish to choose.

Visage Blind and Curtain combination:

This combination allows you to have a very striking design to your window dressing using the visage blind inside the window recess and either a dress curtain to one or both sides of the window or a full curtain.

We can advise on all design aspects and assist with fabric choice, window dressing options and installation to achieve your ideal solution.

🌀 We Offer A Free Measure And Quotation As Well As Expert Fitting Services 🌀

ROLLER, ROMAN, VENETIAN & VERTICAL BLINDS

OUTSIDE THE RECESS

When measuring outside the recess you will need to allow the finished blind to overlap the recess to help block out light and draughts. Using a metal tape measure will be more accurate.

Measure your length from top to bottom and the width from side to side. In addition, add 5cm each side to the width to ensure your finished blind will adequately cover your window. Also add 15cm to the length of the recess to allow for the installation height of the blind above the recess. We also require the installation height from the floor to calculate the length of the system chain to comply with current child safety legislation - then bottom of the chain should be a minimum of 1.5 metres off the floor, ensure there are no obstructions.

Roman blinds are usually supplied on a system, which is a cassette which house the roller mechanism, with either a left or right-hand child safe pull chain.

Our systems allow for ceiling fix or wall fix. They are supplied with all fixings required. We offer a full fitting service.

Our quotation is supplied based on your measurements as supplied - we offer a measurement service to ensure a perfect fit.

INSIDE THE RECESS

When measuring inside the recess you will need to ensure that there are no obstructions in your recess that will stop the blinds operation. Using a metal tape measure will be more accurate.

Measure your length from top to bottom and the width from side to side inside your recess as shown in the illustration. Take 3 measurements top to bottom and side to side to allow for any variation inside your recess. Take the shortest width, and the shortest length of your recess. We also require the installation height from the floor to calculate the length of the system chain to comply with current child safety legislation - then bottom of the chain should be a minimum of 1.5 metres off the floor.

Roman blinds are usually supplied on a system, which is a cassette which house the roller mechanism, with either a left or right-hand child safe pull chain.
